URBANFUSION CONSTRUCTION

The design of UrbanFusion's 2-layer solid-sawn European Pine construction is based the standard DACS III concept which CRAFT has had tremendous success with over the past several years. UrbanFusion flooring features a 3.0mm European Oak lamella supported by an 11mm thick solid sawn core for a total overall thickness of 14mm (9/16").

FINISH

The standard finish of UrbanFusion flooring is DuRa Finish Ultra Matte, a highly protective wood finish that looks natural and harmonizes with wood's natural texture. A commercial grade finish is available as an optional upgrade upon request.

HERRINGBONE / CHEVRON

All UrbanFusion colours are available in herringbone and chevron patterns – great options for creating visually stunning spaces.

WIDTHS, LENGTHS & GRADE

UrbanFusion planks come 7 1/2" (190mm) wide, with lengths up to 75" (1,900mm). A box of UrbanFusion flooring will average 70% full lengths with 30% broken lengths. All UrbanFusion floors are Natural Grade, allowing small filled voids and natural wood character such as knots.

GREEN MANUFACTURING

All UrbanWood floors are manufactured in a state-of-the-art wood flooring manufacturing facility that is fully owned and managed by Creative At Home Enterprises Inc. The facility runs on green, renewable energy, is Zero-Waste Certified, and is designed to provide a healthy, VOC-free working environment for its employees. For more information visit urbanwoodfloor.com/sustainability

HEALTHY HOME

GREENGUARD Gold certification proves that UrbanFusion floors have proven ultra-low VOC emissions and contribute to a healthy living environment with excellent indoor air quality.
